THEME OF THE CONFERENCE: Recent Advancement and Innovation in Business & Management & Its Contemporary Issues in Sustainable Economy “ICRAIBM 2023”

The conference aims to provide a platform for knowledge sharing between academic researchers and business practitioners in order to support transformative changes for addressing contemporary organizational challenges. Disruptive technologies and innovations are challenging businesses to rethink who they are, what they stand for, how they operate and how they could organize for the future. For successfully pivoting the business, organizations must nurture a culture that promotes constant transformation and understand that convergence in all spheres is absolutely critical when making transformations. Facing a complex future, leaders/managers increasingly need research-based information and evidence more than ever.

The academic research scenario in India is changing in light of the recent developments in educational reforms, especially with the implementation of NEP 2020, which seeks to transform higher education by focusing on skill-based education to meet the rapidly changing needs of the industry and the economy
